

Projekt HYDROGEN DANUBE HYDA

Michal Brucháč

Corporate Affairs www.slovnaft.sk www.molgroup.info

Current status:

- Basic Project outline created
- Progressed cooperation on the backbone between major partners
- Establishing partnerships throughout Europe
- Elaborating the basic principles of cooperation

Which partners are you looking for?

- Partners with international connections active in R&D with a proven track record
- Partners with some track record in the field novel and safe Hydrogen storage and handling
- Partners in mass transportation propelled by H₂

What is our value proposition:

- has experience in PM and project implementation
- strong partner with a long history in chemistry and energy
- focus on creating Hydrogen infrastructure
- supports decarbonization of mass transportation

The project will assess the following pillars of the hydrogen value chain:

- Clean Hydrogen Production
- Hydrogen use in transportation and industry
- Hydrogen Transmission and Distribution
